

We thank you for your patience during the roundabout construction and we will endeavour to keep disruption to a minimum.

Phase 2 – (January 2023 to May 2023) - Brixham Road, new roundabout, southern crossing and S104 drainage works on highway.

Persimmon Homes have designed the works to minimise the programme, but to undertake the works in a safe manner as quickly as possible, a road closure to traffic is required with a diversion along Goodrington Road and Dartmouth Road. The closure is targeted to commence on the 3rd January 2023 and will be as indicated on the plan below.

A diversion route will be signposted as indicated in the plans. 'Residents Only' access will be maintained at all times for the properties located within the road closure. This will be controlled under the temporary traffic management system.

The proposed road closure is until 12th May but the road will be opened for two weeks during the Easter holidays from the evening of 30th March to the evening of the 16th April 2023. Following that date, the remaining works will be undertaken with traffic management wherever possible but at the end of the programme a one-week closure will be required for road crossovers and utility connections. As before, residents access will be maintained through this period.

Roadform will contact all Brixham Road residents prior to commencement of this phase to discuss works being carried out, access arrangements and understand any specific needs or issues they may have.

Phase 3 – (May 2022 to October 2022) – Long Road and Windy Corner works.

Once the Brixham Road works are complete, the Long Road and Windy Corner junctions will be improved from mid-May until the summer moratorium and then from September until completion. At all times traffic will be able to flow through these junctions under traffic management.

Contact.

For any queries or communications associated with the works please email Amie Harris aharris@roadformcivilengineering.co.uk
